

Warranty

Alliant Metals Inc. is committed to customer satisfaction. All Alliant (AM) target products are unconditionally guaranteed for quality material and workmanship. All replacements will be made through Alliant Metal Inc's Tactical Metal Target Division. Warranty does not cover damage as a result of improper use of target. Improper use is defined as the use of firearm that is not within the range of tolerance described for each particular product, use of ammunition beyond the tolerance of product, including high velocity, armor piercing, full metal jacketed or shot gun slug ammunition. For this reason Alliant Metals Inc. cannot accept any liability for the result of their use or abuse. Typical behavior of steel may allow for dimpling or cratering of target. If this should occur simply turn target around and shoot the reverse side to reuse for extended shooting pleasure.
